- Cordoba School Group, Casablanca

EXPERIENCE

DevOps and Full Stack Web Development Intern

Nomatis

📅 07/2024 - 09/2024   📍 Rabat, Morocco

- Implemented CI/CD pipelines using Azure DevOps and GitHub Actions, reducing deployment time by 40% and increasing release frequency by 60%
- Developed a scalable web-based application using Spring Boot and Angular, resulting in a 30% increase in B2B account management efficiency
- Designed and implemented an interactive dashboard that improved decision-making processes by 25% through real-time data visualization

Stagiaire en Développement Web

Extra Room

📅 07/2023 - 07/2023   📍 Casablanca, Morocco

- Collaborated on modeling a platform using UML, improving project planning efficiency by 20%
- Contributed to frontend and backend development, resulting in a 15% increase in platform responsiveness and user satisfaction

PROJECTS

Student Document Request System

- Collaborated with a team to develop and deploy a web application for student transcript and certificate requests.
- Containerized the application using Docker for consistent development and deployment environments.
- Implemented CI/CD pipeline using GitHub Actions for automated testing and deployment.
- Utilized Azure Container Registry for secure storage and management of Docker images.
- Employed Git for version control, ensuring efficient collaboration and code management.

Simplified Hotel Management System

- Developed a hotel management system using Python and Django, featuring room booking, guest management, and billing functionalities.
- Implemented Infrastructure as Code (IaC) using Terraform to provision and manage EC2 instances on AWS.
- Containerized the application with Docker for consistent deployment across environments.
- Designed and implemented a deployment pipeline for automated updates and rollbacks.

SUMMARY

Profile Picture DEVOPS ENGINEER (PFE) Innovative DevOps Engineer with a strong background in full-stack development and a passion for optimizing software delivery pipelines. Skilled in implementing CI/CD processes, containerization, and cloud technologies to enhance development efficiency and application performance. Proven track record of reducing deployment times by 40% and improving system reliability by 25% through automation and infrastructure-as-code practices.
