El Mestapha DAKOUKY

5th-year Computer Science and Network Engineering student seeking a final year internship (PFE)

5th-year student at EMSI and M2 MBDS at the University Côte d'Azur, passionate about DevOps, Data Engineering, and Full Stack Development. With experience in data science and cloud-native development, I am seeking a final-year internship to apply my skills in automation, deployment, and modern application development.

EDUCATION

Master's in MIAGE in Mobility, Big Data, and Systems Integration (MBDS)
University of Côte d'Azur - Casablanca - From 2021 to 2025

Engineer in Computer Science and Networks, OPTIOM (MIAGE)
Moroccan School of Engineering Sciences (EMSI) - Casablanca - From 2021 to 2025

Scientific Baccalaureate
Cordoba School Group - Casablanca - From 2018 to 2019

PROFESSIONAL EXPERIENCE

Full Stack & DevOps Internship
Nomatis - Rabat - From July 2024 to September 2024

- Developed a scalable account and product management app for B2B and B2C vendors using Spring Boot, Angular, PostgreSQL, and Docker.
- Optimized CI/CD pipelines with Azure DevOps and GitHub Actions, reducing deployment time by 40% and increasing release frequency by 60%.
- Improved Docker configurations and deployment processes in a hybrid environment for faster, reliable application delivery.

Data Science Internship
CodSoft - India - From July 2024 to August 2024

- Developed ML models for movie rating prediction and fraud detection.
- Implemented data pipelines using Python and scikit-learn.
- Set up predictive analytics solutions with performance optimization.

Web Developer Internship
Extra Room - Casablanca - From July 2023 to August 2023

- Designed and developed a stock management application using PHP, Bootstrap, and MySQL, ensuring a robust and user-friendly interface.
- Implemented unit tests with PHPUnit to ensure application stability and functionality.
- Optimized performance, reducing errors by 15%.

PROJETS ACADÉMIQUES

Student Document Request System

- Developed a web app with Spring Boot, MySQL, Freemarker, and Bootstrap for student document requests.
- Configured CI/CD pipelines with Git and Docker for efficient deployment.
- Managed containers with Azure Container Registry for improved scaling and deployment.

E-commerce Mobile Application

- Developed a mobile app with Flutter and Firebase for selling air conditioning products.
- Integrated payment and order management features.

Hotel Management System

- Developed an application using Python/Django for hotel management.
- Deployed on AWS EC2 with Infrastructure as Code (IaC) using Terraform.
- Implemented reservation and client management features.
